Table Tuning

Tabla tuning guidelines

- Download any tuner app on iOS/Android. Including a link below for free tuner app on iOS and sending instructions based on this app: https://apps.apple.com/us/app/tuner-lite-by-piascore/id635828559
- Open the app, and press the “Y” symbol
- Hold the tuner app close to the tabla and play Tin (open sound) on the tabla
- The app will show the approximate tuning of the tabla
- If the “b” light turns on, use the flat side of the hammer to hit downwards on the tabla
- If the “#” light turns on, use the pointed side of the hammer and hit upwards from underneath the Gajra.
- Keep repeating above steps until the Green light turns on. Then rotate the tabla around, and keep repeating until the Tabla is tuned from all sides.
